Professional Summary

Results-driven **Software Developer** specializing in frontend and backend development using the **MERN stack** (**MongoDB, Express, React, Node.js**). Experienced in building scalable web applications and streamlining enterprise workflows. **AWS Certified Developer** with strong skills in **API integration** and **responsive UI development**. Actively seeking a challenging developer role in Chennai.

Education

B.E, Computer Science & Engineering, Velammal College of Engineering and Technology, Anna University – Madurai, India 2019 – 2023

- Percentage: 89% (Distinction)
- Higher Secondary (+2), Mahatma Mat. Hr. Sec. School, Madurai – 2019, 80%
- SSLC, Mahatma Mat. Hr. Sec. School, Madurai – 2017, 97%

Technical Skills

Languages: JavaScript (**React.js, Node.js**), Python, SQL

Frameworks & Libraries: **React.js, Node.js, Express.js**

Front-End: HTML5, CSS3, JavaScript, **Responsive Design**

Back-End: **Node.js, RESTful APIs, Express**

Databases: **MongoDB, MySQL**

Tools: Visual Studio Code, GitHub, Postman

Operating Systems: Windows, Linux, MacOS

Professional Experience

Software Developer, Sify Technologies Limited – Chennai, India June 2023 – Present

- Spearheaded the development of a comprehensive **MDM Admin Website** by designing a dynamic and **responsive frontend** using **React**. Collaborated closely with stakeholders to implement real-time device monitoring and control features. Engineered backend services with **Node.js** and **MongoDB** to support secure data storage, authentication, and robust **API endpoints**, resulting in **enhanced administrative efficiency** and reduced device-related discrepancies across the organization.
- Led the end-to-end development of the **EPMS Internal Web Application** to automate and manage employee evaluations, timesheets, and productivity metrics. Built an intuitive **frontend** in **React** to enable seamless user interactions and reporting dashboards. Developed the **backend** with **Node.js** and **MongoDB**, ensuring data consistency, user authentication, and scalable architecture. This initiative **improved operational workflows** and facilitated **data-driven decision-making** for HR and management teams.

Certifications

- **AWS Certified Developer** – Associate (Valid through 2026)
- Advanced JavaScript Algorithms & Data Structures (freeCodeCamp)

Key Projects

MDM Admin Website Mar 2024 – Dec 2024

- Designed and developed a comprehensive **MDM Admin Website** for real-time device tracking and configuration, enabling IT teams to efficiently monitor, manage, and configure devices across the organization. Implemented a user-friendly interface with **React** for streamlined navigation and actionable insights. Integrated **backend services** using **Node.js** and **MongoDB** to support dynamic data handling and device status synchronization. The portal significantly **enhanced monitoring accuracy** and **operational efficiency** by automating manual tasks and providing centralized control over device management.

EPMS Internal Website Jan 2025 – Present

- Developed a full-stack **EPMS Internal Website** with real-time reporting capabilities to streamline invoice, revenue, and employee timesheet management. Utilized **React** for building an intuitive and **responsive frontend** interface, while implementing **backend logic** with **Node.js** and **MongoDB** for secure data processing and storage. Integrated employee timesheet tracking to enable accurate and efficient recording of work hours, contributing to a **20% improvement in overall team productivity** and **administrative efficiency**.
