PROJECTS

Binge Watch

- A React project that depicts an OTT clone, where user can search,watch movies,series with an integrated API.

Attention Mechanism of brain tumor classification using CNN

- A method using CNN is proposed for brain tumor segmentation and identification from MRI images. Input images are converted to grayscale and pre-processed with adaptive bilateral filtering to remove noise. Binary thresholding and CNN-based segmentation are then applied to accurately detect tumor regions.

Advanced energy efficient lighting system in remote areas.

- A node MCU based system use LEDs and IR sensors to automatically manages street lights.

PUBLICATIONS

Ensemble Machine Learning Classifier (Comprising of Support vector machine, Random Forest and Multiple Regression) for Soil Nutrient Prediction in Non Agriculture Lands Using Multispectral Remote Sensing Images.
